

# SMART SCHOOL WEBSITE

## A Professional Digital Presence + Easy Admin Control

A ready-to-present website solution designed for schools that want to build trust with parents, communicate important information quickly, and manage website content without depending on a developer for every small update.

**For School Principals • Management • Administrators**

# Why a Modern School Website Matters

Your website becomes the school's official digital front desk — available to parents and visitors 24×7.

### Build Parent Trust

Present the school, leadership, teachers, programs, activities, achievements and contact information in one professional place.

### Communicate Faster

Publish announcements, notices and downloadable files so parents can access important information without waiting for a circular to be shared individually.

### Show School Life

Use the Gallery and Events sections to showcase activities, celebrations, workshops, sports and memorable moments.

### Keep Information Current

The admin dashboard lets authorised staff update key website content from one place.

### Promote the School

A polished website gives prospective parents a clear first impression and makes the school easier to discover and contact.

### Reduce Repetitive Work

Common content such as contact details, social links, WhatsApp number and school name can be managed centrally.

Core idea: Give parents a professional, informative and continuously updated digital experience while giving the school a practical content-management system.

# What Parents & Visitors Can See

The public-facing website is organised to present the school's identity, people, activities and communication clearly.

| Website Area | Purpose |
| --- | --- |
| School Identity | School name, logo, leadership information and key introductory content. |
| Teachers & Team | Teacher/team profiles and school personnel information. |
| Programs & Services | Programs and school offerings presented in dedicated sections. |
| Hero / Homepage Highlights | Visual hero images and key homepage messaging. |
| Events | Upcoming and school event information. |
| Student Birthdays | Birthday information managed from the admin dashboard. |
| Parent Reviews | Parent feedback can be reviewed and approved before publication. |
| Gallery | Section-wise school photographs with latest sections displayed first. |
| Announcements | Latest announcements displayed in list form with downloadable image/PDF files. |
| Contact & Social | Central contact information, WhatsApp and footer social-media links. |

The website is designed as a school communication and presentation platform rather than a static brochure.

# Admin Dashboard — Complete Content Control

The dashboard brings the main website controls into one management area.

### Teachers

Manage teacher/team information displayed on the school website.

### Events

Manage school event content so the public website can reflect current activities.

### Our Programs

Add or remove programs, including program name and related images/teacher or program-head photo.

### Hero Images

Add and manage homepage hero images to keep the first screen fresh and engaging.

### Student Birthdays

Manage student birthday entries shown on the website.

### Colour Theme

Control website card/block and section background colours from the dashboard.

# Admin Dashboard — Communication & Engagement

Keep parents informed and make the website easier to maintain.

### Contact Details

Update the school's contact information from the dashboard so supported website pages can stay synchronised.

### Parent Reviews

Review parent submissions and approve, reject or delete reviews before publication.

### WhatsApp Settings

Set the WhatsApp number used by website Contact Us buttons for direct parent enquiries.

### Social Media Handles

Update Facebook, Twitter/X, Instagram and LinkedIn links displayed in the website footer.

### Announcements

Add a description and upload a related JPG, PNG, WEBP image or PDF. The publication date is generated automatically and newest announcements appear first.

### Gallery Management

Create sections, rename or delete them, upload multiple images, and remove individual images. Latest sections appear first on the public Gallery.

Result: routine updates such as a new notice, event photo, social link or contact number can be managed from the admin area instead of editing every webpage manually.

# Two High-Value Features for Parent Communication

Designed specifically for the information that changes frequently.

## ANNOUNCEMENTS

Simple list view with Date, Description and Download.

- Publication date is generated automatically.
- Latest announcement appears at the top.
- Upload JPG, PNG, WEBP or PDF files.
- Edit or delete announcements from admin.

## GALLERY

Section-wise image management for school activities.

- Create sections such as Annual Function, Sports Day or School Events.
- Rename sections anytime.
- Upload multiple images.
- Delete individual images or sections.
- Latest section appears first.

A principal can quickly direct parents to one reliable place for current notices and school memories.

# How the School Team Uses It

A simple operating flow for everyday website management.

| | |
|---|---|
| **01** | Log in<br>Authorised administrator opens the School Admin dashboard. |
| **02** | Choose a section<br>Select Teachers, Events, Programs, Gallery, Announcements, Contact, Reviews, etc. |
| **03** | Update content<br>Add, edit, upload or remove the relevant information. |
| **04** | Publish / Save<br>Save the change from the dashboard. |
| **05** | Parents see the update<br>The public website reflects the updated school information. |

The system is based on the current school's file-based website architecture, so the website does not require a conventional database for these content-management features.

# READY TO GIVE YOUR SCHOOL A PROFESSIONAL DIGITAL PRESENCE?

## School Website + Admin Dashboard

| | |
|---|---|
| **What we can provide** | A modern school website, responsive design, admin dashboard, content-management features, announcements, gallery, parent communication tools and ongoing customisation based on the school's requirements. |
| **Next step** | Request a live demo of the website and admin dashboard. We can customise the design, school branding, content structure and feature set for your institution. |
